OUTREACH THROUGH TECHNOLOGY

Outreach through technology is our mission by making the Gospel of Jesus Christ known across the globe through technology solutions; to assist the local church and ministries to do the same using those tools; and to provide service and quality with excellence.

The OTM NASplex facility is built from the ground up as a freestanding data center. Freestanding is important from a security perspective. NASplex controls limited access and entry points into the building. Freestanding provides for autonomous and discrete controls of all building systems.

The facility's dedicated grounds provides control over incoming communication links. The industrial complex is designed for a single purpose. There's no public access to NASplex, similar to military, financial, airline, or other energy/critical service related infrastructure facilities around the country.

- **Industrial Datacenter**
- **Microsoft SPLA Licensing**
- **Best in Class Service Providers and Network**
- **Dedicated Resources**
- **We Stand Behind You**
- **IPTV**
- **Hosted & Non-Hosted PBX**

Personal Service

- 24x7 Live Support
- Immediate Response
- Highly Trained Support Staff
- Personal Account Representatives
- Enterprise Class Servers

IBM Enterprise Servers

- Redundant Internet Connections
- Hot-Swappable Redundant SCSI Drives
- Complete Hardware Level Control and Access

Network Neighborhood

- Selective Clientele
- Highly Secure Traffic
- Highly Efficient Networks
- Managed Firewall / IDS, Email Filtering

Freestanding Industrial Datacenter Complex

- Tier-1 Network
- Multiple Diverse Paths to the Internet
- Ground Up Datacenter Design
- UPS and Diesel Backup Generators
